

Axel Tiede®

**system solutions
for access control**

Axel Tiede® mobile protection

Mobile protection is being used for construction sites and events as well as for covering temporary needs in general. Axel Tiede® is providing plug-in equipment for purchase or rent.

Mobile turnstile DK 2-M

Configuration:

- Hot-dip galvanized
- Electro-mechanic drive
- 25 m cable with 230 V Schuko plug
- Connectors for hoarding
- Platform out of grating
- Access control with 50 programmable magnetic cards
- Passing width 650 mm

Options:

- Lighting
- Integration in existing access control system

Mobile barrier ES-M including mobile concrete foundation

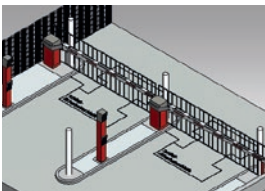

Configuration:

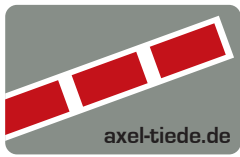

- Housing out of stainless steel
- Remote control with two hand-held transmitters
- Telescopic boom from 3,9 to 6,3 m from pivot
- 25 m cable with 230 V Schuko plug
- Hinged column
- Concrete foundation (1200x800 mm, ca. 430 kg) with threaded stud, separately movable

Options:

- Photoelectric sensor
- Integration in existing access control system
- Housing for cars and trucks
- Color to be chosen individually

Handling possible with hand lift truck, forklift, wheel loader, crane.

Axel Tiede[®]

Service, accessories and spare parts

Axel Tiede[®] develops indoor and outdoor solutions for access control. Standard and tailor-made products are being produced.

Products

- Barrier systems out of stainless steel (electric, mechanic, hand- and horizontal barriers)
- Turnstiles (electric, electro-mechanic and mechanic), side passage optionally
- Pillars and housings out of stainless steel (for cars / trucks)
- Custom solutions and complete systems
- Mobile protection (barrier and turnstiles) for purchase or rent
- Extensive accessories and spare parts

Service

- Complete customer-specific production from prototype to series production
- Technical consultation and feasibility studies for your access control engineering
- 3D CAD simulation and engineering
- Worldwide installation and complete maintenance service
- Complete maintenance service (UVV) and modernization of existing installations
- Rental service
- **Powder coating in own plant**

Technical details

Barrier systems

- Housing in stainless steel
- Microprocessor controlled with crank mechanism and friction clutch
- Two sided or one side support with right or left side barrier beam retainer
- Boom shapes available in flat, round 80, 90, 100 mm, polygonal, rectangular
- Barrier beam lengths up to 10 m, hand barriers up to 7 m
- Horizontal barriers (mechanic and electric) up to 10 m
- Custom solutions
- All executions available with curtain (double curtain up to 2 m height)
- Mobile barriers
- Color to be individually selected (powder coating)

Turnstiles

- Mechanical turnstiles with lock up function
- Electromechanical turnstile system with automated lock up system
- Electrical turnstiles
- Customs solutions, e.g. access width up to 1.5 m
- Side passage optionally
- Material to be chosen (galvanized, stainless steel)
- Mobile turnstiles
- Color to be individually selected (powder coating)

Pillars and housings

- Housing in stainless steel for cars / trucks
- Custom solutions
- Color to be individually selected (powder coating)

We aim to create long-term partnerships and base our activities on the concept of unconditional customer orientation. For more information visit www.axel-tiede.de.

Tell us your requirements and we will put together a tailor-made solution for you. Feel free to contact us at any time.
